"I say, ma, I shall move for open sessions and support em on the floor of the Senate."-Hartford Post.

-Mr. Heavipurse (to his daughter)-'Yes, Carrie, we shall hereafter spend our summers at the North, and when the winter approaches we shall go South, and thus escape the cold weather." Carrie-"But, father, reflect. I can not do it. Just think of the consequences." Mr. H .- "Consequences? What consequences?" Carrie—"Why, you see if I am to have two summers a year, by the time I am twenty-five I shall be a woman of fifty summers. Really, I can not consent to grow old as fast as that." -Boston Transcript.

TEA DYSPEPTICS.

The Effect; of Tea and Coffee on the Digestive Organs.

It has occurred also to the writer to make many observations as to the circumstances under which tea and coffee are found to agree or disagree with different persons; in the first place, as Sir W. Roberts has pointed out, tea, if taken at the same time as farinaceous food, is much more likely to retard its digestion and cause dyspepsia than if taken a little time after eating; and the custom adopted by many persons at breakfast, for instance, of eating first and drinking their tea or coffee afterward is a sensible one; so also it is better to take one's five-o'clock tea without the customary bread-and-butter or cake than with it.

Indeed, while there is little that can be said against a cup of hot tea as a stimulant and restorative, when taken about midway between lunch and dinner, and without solid food, it may, on the other hand, be a fruitful cause of dyspepsia when accompanied at that time with solid food. It is also a curious fact that many persons with whom tea, under ordinary circumstances, will agree exceedingly well, will become the subjects of a tea dyspepsia if they drink this beverage at a time when they may be suffering from mental worry or emotional disturbance.

Moreover, it is a well-recognized fact that persons who are prone to nervous excitement of the circulation and palpitations of the heart have these symptoms greatly aggravated if they persist in the use of tea or coffee as a beverage. The excessive consumption of tea among the women of the poorer classes is the cause of much of the so-called "heart-complaints" among them; the food of those poor women consists largely of starchy substances (bread and butter chiefly), together with tea, i. e., a food accessory which is one of the greatest of all retarders of the diges-

tion of starchy food. The effect of coffee as a retarder of stomach digestion would probably be more felt than it is were it not so constantly the practice to take it only in a small quantity after a very large meal; it is then mixed with an immense bulk of food, and its relative percentage proportion rendered insignificant; and to the strong and vigorous the slightly retarding effect on digestion it would then have may be, as Sir W. Roberts suggests, not altogether a disadvantage; but after a spare meal and in persons of feeble digestive power the cup of black coffee would probably exercise a retarding effect on digestion which might prove harmful.—Dr. J. Burney Yee, in Popular Science Monthly.

HEMLOCK MOLES.

How a French Gardener Destroys His Epicurean Mold-Turners.

A conscientious French gardener suspended his chronic war upon the mole for one entire season, to give that much detested animal a fair chance at the white grabs. Science had asserted that | Cold Harbor, a tavern. The Federals the mole was an epicure in grubs, and our gardener had faith in science. His garden was infested with grubs, and here was his opportunity. At the end of the season he recorded the fact, with sad solemnity, that the mole lived on such good terms with the grubs that he had two enemies in place of one. Not that the mole is not fond of grubs; but give him free range of the salad and berry beds and he acquires more refined tastes. Unluckily the mole seems to have no enemy, to speak of, except man, and man often makes a pitiful show against him with his poisons and his traps. The French gardener referred to is eager for information on the mole question. But while waiting for points from other victims, he offers the following as the best remedy: Take as many walnuts as there are mole holes, add a handfal of hemlock leaves (Conium mandful of hemiock leaves (contain or steel, by musket-ball or bayonet stab. have lost the bet." and-and-a-half, make the paste into bullets and put in the holes. If the paste be too liquid spread it on a flat stone or bit of slate. The mole eats greedily (or at least, that is his duty) and gives up the ghost instanter. - American Garden-

--One hundred thousand orange trees were planted last winter in Southern California. The crop next winter is expected to aggregate eight hundred thousand boxes of fruit.

DEAD LANGUAGES.

Why They Should Be Shunned By the Youth of This Glorious Land.

asks: "Is there any good reason why particular, the following facts may be our sons should not study the dead languages?" It appears to worry him considerably, and he says he hopes to see the fullest discussion of the important a vessel having a midship section of 841 question. The East has taken hold of square feet, consumes 160 tons of coal it and the West should certainly be per day, or 1,600 tons on the ten days' heard from on the subject.

It is probably a fact that the untutored West is against the dead languages. A in 1869, and having a midship section language that has been so indifferent to of 909 square feet, consumed 95 tons could in no way help to build up the sel on the Atlantic, having a length of

NAMES OF BATTLES.

Double Naming of Battle-Fields by North-The conflict of the 14th of September,

1862, is called the battle of South Mountain at the North, and the battle of Boonsboro' at the South. So many battle-fields of the civil war bear double names that we can not believe the duplication has been accidental. It is the unusual which impresses. The troops of the North came mainly from cities, towns and villages, and were, therefore, impressed by some natural object near the scene of the conflict and named the battle from it. The soldiers from the South are chiefly from the country, and were therefore impressed by some artificial object near the field of action. In one section the naming has been after the handiwork of God; in the other section it has been after the handiwork of man. Thus, the first passage of arms is called the battle of Bull Run at the North—the name of a stream. At the South it takes the name of Manassas, from a railroad station. The second battle on the same ground is called the Second Bull Run by the North, and the Second Manassas by the South. Stone's defeat is the battle of Ball's Bluff with the Federals, and the battle of Leesburg with the Confederates. The battle called by General Grant Pittsburgh Landing, a natural object, was named Shiloh, after a church, by his antagonist. Rosecrans called his first great fight with Bragg the battle of Stone River, while Bragg named it af-ter Murfreesboro', a village. So Me-Clellan's battle of the Chickahominy, a little river, was with Lee the battle of speak of the battle of Pea Ridge, of the Ozark range of mountains, and the Confederates call it after Elk Horn, a country inn. The Union soldiers called the bloody battle three days after South Mountain from the little stream, Antietam, and the Southern troops named it prietor, said: after the village of Sharpsburg. Many instances might be given of this double naming by the opposing forces. According to the same law of the unusual, the war-songs of a people have always from to-day. been written by non-combatants. The bards who followed the banners of the feudal lords, sang of the exploits, and stimulated them and their retainers to deeds of high emprise, wore no armor One week later he entered the restauand carried no swords. He is merely transfering the care and custody of the articles to others better able to preserve them for posterity. Mr. Keyes has also pur--Fred H. Carruth, in Chicago Current. chased from Mr. Allen Miller, of Petersburg, Menard County, Ill., formerly a citizen of Springfield, what is left of the parlor furniture of Mr. Lincoln which Mr. Miller purchased when the former removed to Washington in 1861.

A singular circumstance happened in connection with this furniture. About three years ago Mr. Miller built and completed an elegant brick residence in Petersburg, and had just moved into it. While at supper a cyclone destroyed the house without injury to any of the family, the building being totally demolished. The large Lincoln mirror which hung in the parlor was not injured, although the walls around it were blown down. It looked as though Providence considered it too sacred to be destroyed, and also the marble-top table of the parlor set. After Mr. Miller purchased the furniture and was having it removed from the Lincoln residence, Mr. Lincoln requested Mrs. Miller to let the table and one of the chairs remain, as he had some very important writing that he must attend to before he left the city, and would like to have the table to write upon, to which she consented. Consequently the very last writing that Mr. Lincoln did before he left Springfield for the last time was upon this identical table and seated upon one of these chairs.

To make Mr. Keyes' collection more complete, Major Alfred A. North, of this city, presented him with one of the old cushions of Mr. Lincoln's carriage, which was used by him and family for over twenty years, and was broken up and distributed as relics some years ago, Major North securing one of the cushions, which he has been using himself up to this time in his office chair .-Springfield (Ill.) Cor. Chicago Times.

A BETTING MAN.

The Head-I-Win and Tail-You-Lose Sort of a Game Played by a Tramp. A man whose clothes were old, but whose expression was frank, went into a restaurant and, addressing the pro-

"I have no money, mister, and I am very hungry. Now, sir, I want to bet you one dollar that if you give me a meal I will pay you within one week

"I don't know you," said the proprietor, "but I'll go you one just for The man ate heartily and withdrew.

"Well, I'm here." "So I see. Have you come to pay "Liberty or Death," never once put me?" themselves in the way of a death by lead "No, I have come to tell you that I

> "Well, then, you owe me a dollar instead of fifty cents." "But where is my money?" "Well, in regard to that, I want to bet you two dollars."

> "Name the bet." "Bet you two dollars that I never pay you. You've lost, so now hand me over two dollars."

There does not exist any proof of the pecially the introduction of what is saw Traveler.

HOME AND FARM.

-Whitening inside is a good thing to do. It makes the rooms of a house neater and more wholesome. -Mouldiness is occasioned by the

growth of minute vegetation. Ink. paste, leather and seeds most frequently essential oil will answer equally well.-Cleveland Leader.

-The best grass for an orchard is undoubtedly orchard grass with red clover. or red clover alone. Plenty of seed should be used. Cut when weeds make their appearance, afterward pasture with hogs or sheep. - Western Rural.

-A farmer in Central New York. where many beans are raised, says the best crops are produced when they are planted in hills two feet apart each way, and the soil worked with a narrow cultivator. He advises planting from five to seven beans in a hill.

-To make good rusks take one pint of milk, one cup of yeast; mix it thin; ily. when light add twelve ounces of brown sugar, two ounces of butter, four eggs, flour sufficient to make stiff as bread: when risen again, mold and spread it on tins .- The Caterer.

-A writer in the Poultry-Keeper keeps what he calls "home-made tineture of iron" in a bottle of water in to their health, he thinks, but it may be doubted.

-Whitewash is to some extent a disinfectant, and should be used in cellar and kitchen closets not less than once a year, twice being better. A good whitewash is made of one peck of slacked lime, a pound and a half of white vitriol, a pound of salt and half a pound of melted glue, the salt and glue keeping the wash from rubbing off. For cellars the slacked lime is sufficient .-Albany Journal.

-For a milk pudding put one quart of milk on where it will cook slowly. Wash half a teacupful of rice and stir it into the milk, and occasionally stir this until twenty minutes before using; then put a tablespoonful of sugar and a small piece of butter, and bake twenty minutes. This, sometimes called poor man's pudding, is wholesome and palatable. It is better to be three hours in cooking .- Boston Globe.

-Horseradish should be planted as early in the season as possible, or just as soon as the ground can be properly prepared, and if large roots are desired the soil can not be made too rich and deep. In planting always use sets. These are the rootlets or branches of the main root, which are too small for table use. They are cut into pieces about four or five inches in length, and in such a manner that there will be no danger in setting the roots upside down. Sets planted upside down will never make good roots.—Prairie Farmer.

-Sweet Wafers: Six eggs, one pint flour; two ounces melted butter, one and one-half cups powdered sugar, one Beat whites and yelks separately and very stiff, rub the sugar and butter together, and work in first the velks, then the milk and then flour and whites. Bake in well-buttered wafer or wafflesmooth, round stick, not larger than your little finger, slipping it out carefully when the cake takes the right shape. These little cakes are an acceptable addition to any tea or supper table, and look well among fancy cakes in a basket. - Boston Budget.

OUEEN-RAISING.

A Simple and Approved Method of Rais ing Queens Artificially.

In the matter of rearing queens, there are two methods, which we will style artificial and natural. Artificial queens, raised from artificial cells. Natural queens, raised from natural cells, as when swarming.

In raising queens artificially there are CATTLE—Native Steers...... 5 20 & 6 50 when swarming.

several ways, of which the following is probably as good as any other, and can be carried on any time during the sea-

son, from May to October. Select a colony from which you wish to breed, being careful to examine and see that they have plenty of young brood and eggs. Remove the queen, and, in order to save her, take out a frame of hatching brood and adhering bees at the same time. Place these with the deposed queen in a new hive and in a new location. You can build this up to any strength by inserting frames of brood from other colonies. The colony left queenless will at once start a number of queen cells, visible in three or four days. It is hardly necessary, in this enlightened day of ours, to state that the young queens thus forming are reared from eggs that would otherwise have hatched worker bees had not the queen been removed. At the end of eight days the queen cells formed will be capped over, eight days more, or six-teen days in ail, and these cells will hatch out perfect queens. Between the time in which the queen cells are capped over and hatching time is the time to make good use of them. When they are about twelve days old, cut out the cells, inserting each in a frame of bees and brood taken from some other colony.

Be careful in selecting frames of brood not to get the queen, as she would soon destroy the cell containing your young queen. After having inserted your queen cells in frames of young hatching brood and bees, place these frames (one in each hive) separately, forming small colonies, generally called nuclei. With each colony so formed place an empty frame of comb and a division board to contract the space to suit the size of the colony formed. You can, if you wish, take frames of brood or honey fron other colonies, instead of the empty frames, building up to a full colony, but, if you have made good selections of brood frames this will not be necessary, as they will soon multiply and increase to full size. If you have been successful in your transferring you will have quite a number of two or three frame nuclei, just right for additional queen raising. In two or three days the young queens will be out and in ten days they will be laying and ready for sale,

Doctor (to patient)-You are all right physically, but you must take care of your mental self. You must not read any thing and must not allow any one in talking to you to engage your attention.

Patient-But how must I manage it, deputy sheriff?

Patient-Yes, sir. you as a juryman, -Arkansas Traveler. [Paris (Mo.) Mercury.]

Frank Allen, "young and handsome," and Mattie McCarthy, "pretty as a picture," eloped from Pendleton County, Ky., and were chased by the girl's father. The runaway couple secured a minister at this place and were married in a skiff on the river, while the angry father stood on the bank with a shotgun and impatiently watched the proceedings, swearing might-

Free from Opiates, Emetics and Poison.
SAFE.

Many splendid fortunes lie in the English Court of Chancery, which belong to Amercan citizens. The court has held possession in some cases, for more than one hundred and fifty years. Cox & Co., London, England, have with great care and diligence compiled a book containing the names of fifty thousand heirs and their descendants who have been advertised for to claim who have been advertised for to claim these fortunes. The book gives Christian these fortunes. The book gives Christian and surnames, and instructions how to proceed for the recovery of money and estates. Sent free to all parts of the world upon receipt of one dollar. Remittance may be made by registered letter or money order. Address COX & CO., 41 Southampton Buildings, London, England. Cox & Co. refer by permission to the Kellogg Newspaper Company. New York.

as well as in everything else. By the universal satis-

fact on it has given, and by the many remarkable

cures it has accomplished, Hood's Sarsaparilla has proven itself unequaled for builting up and strength-ening the system, and for all diseases arising from or

promoted by impure blood. Do not experiment with any unheard-of and untried art cie which you are told

is "just as good," but be sure to get only Hood's Sarsa

"I consider Hood's Sarsapariila the best medicine I

ever used. It gives me an appetite and refreshing

sleep, and keeps the cold out." John S. Fogo, 10 Spruce Street, Portland, Me.

"I find Hood's Sarsaparilla the best remedy for impure blood I ever used." M. H. BAXTER, ticket
agent, P. & R. Rd., Bound Brook, N. J.

"Hood's Sarsaparilla takes less time and quantity to
show its effect than any preparation I ever heard of."
Mrs. C. A. Hubbard, N. Chill, N. Y.

Hood's Sarsaparilla

old by all druggists. \$1; six for \$5. Prepared by

fifteen years with a lung trouble. I have spent thou sands of dollars to arrest the march of this disease; but temporary relief was all that I obtained. I was unfit for any manual labor for several years. A friend strongly recommended the use of Swift's Specific (S. benefited by its use in some lung troubles. I resolved totry it. The results are remarkable. My cough has left me, my strength has returned, and I weigh sixty pounds more than I ever did in my life. It has been three years since I stopped the use of the medicine, but I have had no return of the disease, and there are no pains or weakness felt in my lungs. I do the hardest kind of work.

Montgomery, Ala., June 25, 1885.

PR. JOHN BULL.—I have examined the prescription for the preparation of DR JOHN BULL'S SARSAPA-RILLA, and believe the combination to be an excellent one, and well calculated to produce an alterative im-pression on the system. I have used it both in public and private practice, and think it the best article of JAMES MOORE, Louisville, Ky BLOOD Are the great secretory organs of the body. Into and through the Kidneys flow the waste fluids containing poisonous matter taken from the system. If the Kidneys do not act properly this matter is retained and poisons the blood, causing headache, weakness, pain in the small of back and loins, flushes of heat, chills, with disordered stomach and bowels. BULL'S SAESAPARILLA acts as a diuretie on the Kidneys and bowels, and directly on the blood as well, causing the great organs of the body to resume their natural functions, and health is at once restored.
